

## Task 1

1. How to write your first React component

Tasks:

1. Create a simple functional component named Greeting that returns “Hello, World!” within a `<h1>` tag.

### Greeting.jsx

```
import React from 'react'
```

```
export default function Greeting() {  
  return (  
    <>  
      <h1>Hello World!</h1>  
    </>  
  )  
}
```

### Main.jsx

```
import { StrictMode } from 'react'  
import { createRoot } from 'react-dom/client'  
import './index.css'  
import App from './App.jsx'  
import Greeting from './Greeting.jsx'
```

```
createRoot(document.getElementById('root')).render(  
  <StrictMode>  
    <Greeting />  
  </StrictMode>,  
)
```

### Output

# Hello World!

2. Modify the Greeting component to display “Hello, React!”.

### **Greeting.jsx**

```
import React from 'react'
```

```
export default function Greeting() {  
  return (  
    <>  
      <h1>Hello, React!</h1>  
    </>  
  )  
}
```

### **Main.jsx**

```
import { StrictMode } from 'react'  
import { createRoot } from 'react-dom/client'  
import './index.css'  
import App from './App.jsx'  
import Greeting from './Greeting.jsx'
```

```
createRoot(document.getElementById('root')).render(  
  <StrictMode>  
    <Greeting />  
  </StrictMode>,  
)
```

### **Output**

# Hello, React!

3. Create a Gallery functional component to display an image.

### **Gallery.jsx**

```
import React from 'react'
```

```
export default function Gallery() {  
  return (  

```

```

    </>
    <img
src='https://encrypted-tbn0.gstatic.com/images?q=tbn:ANd9GcRFU7U2h0umyF0P6E_yhTX45s
GgPEQAbGaJ4g&s'></img>
  </>
)
}

```

### Main.jsx

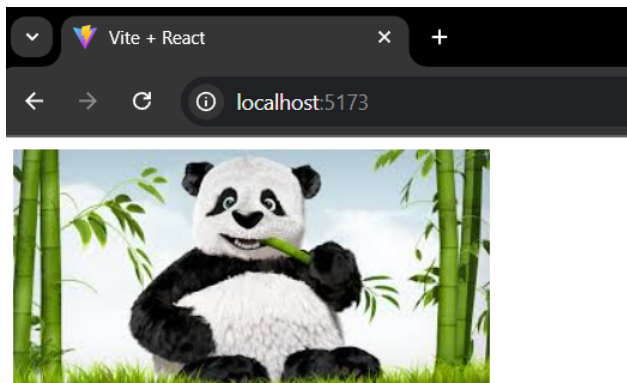

```

import { StrictMode } from 'react'
import { createRoot } from 'react-dom/client'
import './index.css'
import App from './App.jsx'
import Greeting from './Greeting.jsx'
import Gallery from './Gallery.jsx'

createRoot(document.getElementById('root')).render(
  <StrictMode>
    <Gallery />
  </StrictMode>,
)

```

### Output

4. Add Greeting to the Gallery component and display the image and greeting.

### Gallery.jsx

```

import React from 'react'
import Greeting from './Greeting'

export default function Gallery() {
  return (

```

```

    </>
    <Greeting />
    <img
src='https://encrypted-tbn0.gstatic.com/images?q=tbn:ANd9GcRFU7U2h0umyF0P6E_yhTX45s
GgPEQAbGaJ4g&s'></img>
    </>
  )
}

```

### Greeting.jsx

```
import React from 'react'
```

```

export default function Greeting() {
  return (
    <div>
      <h1>Hello, React!</h1>
    </div>
  )
}

```

### Main.jsx

```

import { StrictMode } from 'react'
import { createRoot } from 'react-dom/client'
import './index.css'
import App from './App.jsx'
import Greeting from './Greeting.jsx'
import Gallery from './Gallery.jsx'

```

```

createRoot(document.getElementById('root')).render(
  <StrictMode>
    <Gallery />
  </StrictMode>,
)

```

### Output

**Hello, React!**

5. Write a component called Profile which displays a hardcoded user's name and age.

#### **Profile.jsx**

```
import React from 'react'
```

```
export default function Profile() {  
  const name='kavin'  
  const age=21  
  return (  
    <>  
      <h1>{name}</h1>  
      <h1>{age}</h1>  
    </>  
  )  
}
```

#### **Main.jsx**

```
import { StrictMode } from 'react'  
import { createRoot } from 'react-dom/client'  
import './index.css'  
import App from './App.jsx'  
import Greeting from './Greeting.jsx'  
import Gallery from './Gallery.jsx'  
import Profile from './Profile.jsx'  
  
createRoot(document.getElementById('root')).render(  
  <StrictMode>  
    <Profile />  
  </StrictMode>,  
)
```

#### **Output**

**kavin**

**21**
